

BUS. ARCHITECTURE IN PRACTICE

2

INTRODUCTION

The Business Architecture in Practice course is accredited by The Open Group as a TOGAF® Business Architecture Level 1 credential course. It is considered to be a specialization since it goes into more detail than the TOGAF® 9 Certified (L2) syllabus. Individuals are able to choose whether they wish to study just for this credential or use it as an addition to certification in the TOGAF® 9 Certification programme.

COURSE DESCRIPTION

This three-day Business Architecture in Practice course provides knowledge and understanding of Business Modelling, Business Capabilities, Business Scenarios, Information Mapping, and Value Streams and how to apply them in the development of a Business Architecture based on the TOGAF® Standard, Version 9.2.

The learning objectives for this credential focus on knowledge and comprehension and lead to the award of an Open Badge qualification from The Open Group.

COURSE DURATION

Three days

WHO SHOULD ATTEND?

Individuals who require an understanding of Business Architecture based on the TOGAF® Standard, V.9.2

Professionals who are working in roles associated with developing a Business Architecture such as those responsible for business planning

Architects who want to add a specialization to their existing TOGAF® Certification
